

## Performance Analytics Dashboard Reports

Drill down to the details and perform in-depth analysis with the dashboard's predefined proficiency testing and accreditation reports. The ability to export data to Excel, in addition to other file formats, allows you the freedom to work with your data as you see fit.

| Reports for a Single Laboratory                    |  |
|--|--|
| <b>Proficiency Testing (PT) Reports</b>            |  |
| Name   | Description  |
| <i>Analyte Scorecard</i>                           | View PT scores for each analyte and associated subspecialty performed by your laboratory for up to three years.  |
| <i>Laboratory Subspecialty and Analyte Summary</i> | View PT performance averages for each subspecialty and analyte in your laboratory on a year and event basis. Averages can be compared to both your demographic group average and overall CAP benchmark.  |
| <i>Recent Evaluations</i>                          | View mailings that have been evaluated within the time frame selected.   |
| <b>Accreditation Reports</b>                       |  |
| Name   | Description  |
| <i>Inspection Summary</i>                          | View inspection results for three accreditation cycles as either percent of inspection requirements, compliant or deficient.   |
| <i>Inspection Summary by Section/Department</i>    | View a single laboratory's inspection results for three accreditation cycles.  |
| <i>Inspection Summary by Checklist Module</i>      | View inspection results by checklist module discipline for three accreditation cycles as a percent of inspection requirements compliant or percent deficient.  |
| <i>Inspection Detail by Checklist Module</i>       | View your laboratory's inspection results by checklist module for three accreditation cycles for each checklist module. Use this report to identify the disciplines within your laboratory with inspection deficiencies. This report may also be used to determine the number of checklist requirements used on each inspection for each laboratory.   |
| <i>Inspection Summary by Phase</i>                 | View your inspection results for three accreditation cycles by requirement Phase 1 or 2 as percent deficient or compliant. Phase 1 deficiencies compromise the quality of the services without endangering the health and safety of patients, clients, or personnel. Phase 2 deficiencies may have a serious impact on the quality of services or may endanger the health and safety of patients, clients, or personnel. |
| <i>Laboratory Deficiency Detail</i>                | View your laboratory's deficiencies for the last three accreditation cycles, one cycle at a time.  |

See page 2 for Laboratory System Reports

| <b>Reports for a Laboratory System</b>                         |   |
|--|---|
| <b>Proficiency Testing (PT) Reports</b>                        |   |
| <b>Name</b>  | <b>Description</b>  |
| <i>Analyte Scorecard</i>                                       | View PT scores for each analyte and associated subspecialty performed by your laboratory (or system of laboratories) for up to three years.   |
| <i>Laboratory System</i>                                       | View PT performance averages for your entire laboratory system on a year and event basis. Averages can be compared to the overall CAP benchmark, as well as the respective demographic group average for each laboratory.   |
| <i>Laboratory System Subspecialty and Analyte Summary</i>      | View PT performance averages for each subspecialty and analyte in your laboratory on a year and event basis. Averages can be compared to both your demographic group average and overall CAP benchmark.   |
| <i>Analyte Performance Comparison Across Laboratories</i>      | Compare analyte performance across laboratories in your system on a year and event basis. Averages can be compared to the overall CAP benchmark, as well as the respective demographic group average for each laboratory.   |
| <i>Subspecialty Performance Comparison Across Laboratories</i> | Compare subspecialty performance across laboratories in your system on a year and event basis. Averages can be compared to the overall CAP benchmark, as well as the respective demographic group average for each laboratory.  |
| <i>Recent Evaluations</i>                                      | View mailings that have evaluated within the time frame selected. Click on the mailing to view the Analyte Scorecard for all the graded analytes in that mailing.   |
| <b>Accreditation Reports</b>                                   |   |
| <b>Name</b>  | <b>Description</b>  |
| <i>Inspection Summary by Section/Department</i>                | View a single laboratory's inspection results for three accreditation cycles.   |
| <i>Inspection Summary by Checklist Module</i>                  | View your system's inspection results by checklist module for three accreditation cycles as a percent of inspection requirements compliant or percent deficient. Use this report to identify disciplines within your system with inspection deficiencies.   |
| <i>Inspection Detail by Checklist Module</i>                   | View your system's inspection results by checklist module for three accreditation cycles. Use this report to identify the disciplines within your system with inspection deficiencies.  |
| <i>Inspection Summary by Phase</i>                             | View your inspection results for three accreditation cycles by requirement Phase 1 or 2 as percent deficient or compliant. Phase 1 deficiencies are those that compromise the quality of the services without endangering the health and safety of patients, clients, or personnel. Phase 2 deficiencies are those that may have a serious impact on the quality of services or may endanger the health and safety of patients, clients or personnel. |
| <i>Deficiency Frequency Summary</i>                            | View deficiencies by section/department and by cycle for your system laboratories. Use this report to identify whether inspection deficiencies are spread across the laboratory or concentrated in one or more sections/departments.  |
| <i>Laboratory Deficiency Distribution Summary</i>              | View the frequency at which each deficient requirement was cited in your system laboratories. Use this report to identify the most frequently cited requirements. .   |
| <i>Requirement Deficiency Detail</i>                           | View details for a specific requirement that has been cited in one or more of your laboratories within your system. Use this report to examine frequently cited deficiencies and identify system-wide issues. Use this information to mitigate the risk that other laboratories are also out of compliance with a requirement.  |
| <i>Laboratory Deficiency Detail</i>                            | View your laboratories' deficiencies for the last three accreditation cycles, one cycle at a time. Use this report to examine each laboratory's inspection results as well as the responses to the deficiencies that were cited.  |
| <i>Inspection Result Summary</i>                               | View summary information for your system laboratories that were inspected within a selected period.   |
| <i>Accreditation Decisions</i>                                 | View summary information for your system laboratories that were accredited within a selected time period.   |
| <i>Sanctions</i>   | View summary information for your system laboratories that are currently sanctioned in the accreditation programs. Use this report to identify laboratories that are currently under increased scrutiny by the accreditation program.   |
